

March 10, 2021

Dear Neighbor:

As you may be aware, Tennessee Gas Pipeline Company, L.L.C. has proposed to construct a new electric-driven compressor station in the Township of West Milford, New Jersey as part of its East 300 Upgrade Project. The new compressor station will be located along Tennessee's existing pipeline at 960 Burnt Meadow Road, West Milford, NJ 07480. We wish to invite you to an informational session for the neighbors of the new compressor station to provide additional information about the compressor station and address some of the recent concerns expressed by the local community.

Please join us for an **Informational Session on Compressor Station 327**, which will be held on **Monday, March 22, 2021 at 7:00 pm EDT**. In compliance with current Covid restrictions, this meeting will be held via Zoom.

Tennessee strives to be a good neighbor as it provides a safe, clean, and reliable source of energy to the nation's consumers and industry. Since the 1950s, we have been safely operating and maintaining our pipeline facilities in the Township and the State. We hope that your schedule will allow you to attend the informational session. We look forward to visiting with you on March 22nd.
