Wildlife Guardians Project

Wildlife Guardians Project is a collaborative effort with the New Jersey Department of Environmental Protection

The Project's aim is to identify wildlife crossing hotspots in NJ and to enhance the state's wildlife habitat via improving permeability for terrestrial wildlife.

Goal:

To ensure the long-term persistence of wildlife species in New Jersey.

Volunteers Needed:

The Project invites you to join our efforts in protecting NJ's wildlife. Volunteer groups will adopt a transect of road and survey transects weekly and record any wildlife crossings or road kill. Documentation requires taking a photo, identifying the species the best you can and filling out a questionnaire. The information can be submitted with a mobile device or online. All volunteers must be at least 18 years old.
